

## The Gazebo!

- (1) With whatever tool seems right, score along the black lines between the triangular roof sections. For the body of the gazebo, score between the blue marks.
- (2) With a sharp knife or scissors, do not cut off your fingers, but DO cut out the pieces. Cut the slits in the roof where the eyes will go.
- (3) Fold along your score lines.
- (4) Tape the tabs on the inside to make the roof and body look, more or less, like the picture.
- (5) Put the eyes on the roof and the roof on the body. There is no bottom, so you can put someone inside the gazebo. Hee, hee.
- (6) Alternate eyes are provided for sleeping, angry, and dead Gazebos.

Gazebo based on John Kowalc's art. Rendered by Alex Fernandez.
